## PROJECTS

### ISOHTEL 2023 – [isohtel.com](http://isohtel.com)

Introductory website for a symposium.

Made using HTML, CSS, JS, Bootstrap.

### Mangadex Client – [github.com/vonkez/mangadex-flutter-client](https://github.com/vonkez/mangadex-flutter-client)

Mobile app for reading manga(japanese comic) from mangadex.com.

It uses Flutter for UI and gets manga content from MangaDex REST API.

### R6S Rank Bot – [github.com/vonkez/r6s-rank-bot](https://github.com/vonkez/r6s-rank-bot)

Chat bot for R6S Discord server. Assigns roles to members according to their game ranks using Python, PostgreSQL(with TortoiseORM) and various online apis.

### Other Projects:

- Language Tree Introductory website – [dilagaci.com](http://dilagaci.com)
- Language Tree (Language learning web app) – not released
- Tetris-pygame (Game) – [github.com/vonkez/Tetris-pygame](https://github.com/vonkez/Tetris-pygame)
